THIRD WAVE COFFEE & JUICE BAR

THE SEED

a squeeze & drip co.

## ABOUT THE SEED

The Seed is a third wave coffee and juice bar in Boca Raton, Florida. We provide an artisan experience with an in-house roaster, pour over bar, espresso service, and small batch juices.

## THE SETUP

We built our shop around the La Marzocco GB/5. We knew this machine would be the centerpiece of the shop with a custom matte black powder coat. From there, we moved on to find the best grinders for our espresso and selected two Mahlkonig K30 Airs. For our slow bar, we went with the triple threat of Chemex, Hario V60 and Aeropress. These methods are ground to specific parameters on Baratza Forte grinders and the water comes from a Curtis tank. For our classic batch brew, we pair a Curtis grinder with a Bunn brewer.

A huge factor in our selection was the knowledge of the SCG team. Jason was quick to give us all the good and bad which allowed us to make the very best educated decisions for our shop.

## THE SEATTLE COFFEE GEAR EXPERIENCE

Several internet searches pointed us to SCG. The customer service and endless conversations from the SCG sales team, specifically our point person, Jason, were more than we could have hoped for. We would highly recommend the team at SCG and intend to have a long standing relationship for all our coffee gear needs.

---

“ Trust that the common factor must be great coffee and great people. In order to yield the very best coffees, your equipment must be on point. Do not settle for subpar equipment. Your espresso machine and your grinders are EVERYTHING! ”

RACHEL EADE, OWNER
